

PFOS / PFOA Compliance

June 11, 2008

Dear Customer:

Pericom products comply with EU Directive 2006/122/EC (Amendment of the 30th time Council Directive 76/769/EEC) regarding the use of Perfluorooctanyl sulfonate (PFOS) and Perfluorooctanoic acid (PFOA) in products.

PFOS/PFOA are not contained in Pericom's products. PFOS, however, is contained in the photoresist material used in some wafer fabrication manufacturing processes by our wafer fabrication subcontractors. Any residual PFOS as a result of these processes will be fully removed during the wafer cleaning process. The final product will not contain any PFOS. The usage of PFOS in photoresists or anti reflective coating for photolithography process is exempt by EU Directive 2006/122/EC (Annex 1, paragraph 3a).
