Figure 1: PI5USB66EVB

Figure 1 above illustrates the PI5USB66EVB (evaluation board).
Follow the steps below to power your EVB and start charging as shown in Figure 2 below:

1- Connect the red wire: to +ve terminal of the power supply.

2- Connect the blue wire: to ground terminal of the power supply.

3- Set your power supply: to +5V.

4- Red LED will turn ON: to indicate EVB is powered up

5- Connect your USB adapter to EVB and connect other side to your device that you want to charge.
