

# **Package Qualification Report**

Reliability By Design

#### **Qualification Description:**

The information contained herein represents proof of Reliability and Performance of the Package Series listed below in accordance with the Qualification Plan and test methods referenced in Section 7.0, after exposure to a variety of environments and mechanical events that occur during installation and operational lifetime of the product. Upon conclusion of the testing the product continued to operate within specification limits, demonstrating its capability of reliable operation throughout its lifetime.

The purpose of this report is to present Qualification Test results of the referenced Package Series. The Pericom product data presented in this report qualifies the products manufactured in this package configuration, using the same bill of materials and assembled by the identified subcontractor location. The report describes the qualification test program, procedures utilized, criteria enforced (at the time of product validation), and specific result data obtained during the testing of three lots of semiconductors. The three lots consist of an equal number of units from different date codes, from the same production line and SubContractor to ensure manufacturing repeatability.

#### **Lot Background Information:**

<u> </u>			
Qual Part Number:	PI3VDP411LSTZBE		
Supplier (Code):	GTK (G)		
Pkg Type - Code:	TQFN (ZB48)		
Outline Drawing:	PD-2080		
By Extension Pkg:	ZD24 ZB20		

Qual Test Date:	Oct-2009, updated Jun-2016
Die Attach Material:	1076DJ-G
Wire Size & Material:	0.8mil Au
Mold Compound:	Sumitomo G700HA
Leadframe Material:	A194 Copper
Lead Finish:	100% Matte Sn

#### Pericom's Qualification Test Results:

### **Qualification by Extension Information:**

Where a product of interest is not sampled during this period, it is valid to use the reliability data of the particular process technology or package type family to which the part belongs. All parts within the same family are designed to the same rules, and manufacturing is controlled by SPC. Within a product family, a device can only be fabricated on one process technology/ option, and only assembled on one package type process.
